RULE 335: ASSOCIATIVE VIOLENCE INFORMATION SYSTEM

Section 1. General Considerations / Purpose

The purpose of the Associative Violence Information System (System) is to:

1. Provide law enforcement a consistent citywide framework for identifying individuals and groups that are reasonably suspected of engaging in criminal activity in furtherance of the criminal group, which includes targeted and/or retaliatory violence; and
2. Assist in the investigation of group related criminal activity in the City of Boston; and
3. Through community-based partnerships, assist in the identification of individuals to be referred to social service partners and offered a variety of opportunities as a pathway out of criminal involvement.

The System is only used for valid law enforcement purposes, including enhanced officer safety and awareness, suspect identification, witness and victim identification, identification of individuals for referral to social service partners, resource deployment, investigative support, and to aid in the prosecution of group related crimes.
